

Quantum Cyber GRC for Leaders

Overview

This **one day intensive** course has been developed to respond to urgent enquiries concerning quantum's unchecked expansion and potential threats to industry. This course focuses on what as a leader you need to know and implement to safeguard your organisation.

This training course was developed by Dr Meera Sarma, Dr Thomas Matheus and Steven O'Sullivan from Cystel, a leading UK Quantum cybersecurity organisation to empower leaders of organisations to understand the implications of quantum computing on cyber business activities.

This one day event includes a special guest speaker who is active and well known in academia and industry.

Target Audience C-level, Head of Cyber/Digital/Risk/Financial/Digital Transformation, and Cyber and Digital Technologists and professionals.

0930-1730

5 Modules
plus open
book exam

London or
On-site
at your
organisation
